Research Interests

In my research I work with probabilistic machine learning methods for modeling data with spatial and temporal dependencies. I am motivated by applications of machine learning to earth system modeling, such as weather forecasting and climate modeling. Part of my research is in core machine learning method development, where unique challenges from earth science act as an underlying motivation. These challenges include: irregular observations, high-dimensional data, complex temporal dynamics and the need for accurate uncertainty estimates. I also enjoy developing methods specifically for earth science applications, tailoring the machine learning methods using domain knowledge to solve relevant problems in new ways.

Employment

- 2025 – **Postdoctoral Fellow, ETH Zurich AI Center**
Zurich, Switzerland
- Researching machine learning for earth system modeling.
 - Mentored by Torsten Hoeffler, Siddhartha Mishra, and Benedikt Soja.
 - Fellowship supported by the Swiss AI Initiative.
- 2020 – 2025 **PhD Student, Linköping University**
Linköping, Sweden
Research + 20% of employment teaching.
- 2016 – 2019 **Teaching Assistant, Linköping University**
Linköping, Sweden
Multiple periods.
- 2018, Summer **Summer Intern, Ericsson**
Linköping, Sweden
Internship at Ericsson Research, working with GNSS positioning.

Education

2020–2025 **Doctoral Studies in Computer Science**

Linköping University, 240 ECTS

Linköping, Sweden

- PhD thesis: *Modeling Spatio-Temporal Systems with Graph-based Machine Learning*.
- At the Division of Statistics and Machine Learning (STIMA), Department of Computer and Information Science. Supervised by Fredrik Lindsten (main supervisor), Per Sidén and Tomas Landelius.
- Affiliated PhD Student in the Wallenberg AI, Autonomous Systems and Software Program (WASP).

2015–2020 **Master's program in Computer Science and Engineering**

Linköping University, 300 ECTS

Linköping, Sweden

- Master's thesis: *Probabilistic Regression using Conditional Generative Adversarial Networks*.

2018–2019 **Exchange Studies**

ETH Zurich

Zurich, Switzerland

First year of my master's as an exchange student at ETH.

Research Visits

2023 University College London (UCL)

London, U.K.

Visited the Sustainability and Machine Learning Group at UCL for 5 weeks. Hosted by Marc Deisenroth.

Shorter visits (≤ 1 week)

2026 Norwegian Meteorological Institute

Oslo, Norway

Hosted by Thomas Nipen

2024 European Centre for Medium-Range Weather Forecasts (ECMWF)

Bonn, Germany

Hosted by Mariana Clare

2024 ETH Zurich + MeteoSwiss

Zurich, Switzerland

Hosted by Simon Adamov

2022 Finnish Center for AI + Aalto University
Helsinki, Finland
WASP International Study Visit

Publications

Journal papers

Invited talks

- 2026-02-16 *Probabilistic Deep Learning for Earth System Modeling*, WeatherGenerator Dissemination Workshop
Oslo, Norway
- 2025-05-02 *Probabilistic Weather Forecasting with Hierarchical Graph Neural Networks*, Google DeepMind
Online
- 2024-11-07 *Frontiers in Machine Learning for Weather Forecasting*, RISE Research Institutes of Sweden, Learning Machines Seminars
Online
- 2024-08-22 *Graph-based Machine Learning for Weather*, European Centre for Medium-Range Weather Forecasts (ECMWF)
Bonn, Germany
- 2024-05-02 *Graph-based Neural Weather Prediction for Limited Area Modeling*, MeteoSwiss
Zurich, Switzerland

*Equal contribution.

- 2024-04-30 *Graph-based Neural Weather Prediction for Limited Area Modeling*, ETH Zurich
Zurich, Switzerland
- 2024-04-17 *Graph-based Machine Learning for Spatio-Temporal Data, with Application to Traffic and Weather Forecasting*, University of New South Wales (UNSW)
Sydney, Australia (Online)
- 2024-03-05 *Graph-based Neural Weather Prediction for Limited Area Modeling*, Uppsala University
Uppsala, Sweden
- 2024-01-11 *Neural Weather Prediction for Limited Area Modeling*, IEA Wind Task 51 Webinar: Forecasting for the Weather Driven Energy System
Online
- 2023-10-10 *Graph-based Neural Weather Prediction for Limited Area Modeling*, Danish Meteorological Institute
Copenhagen, Denmark

Participation in Scientific Events

- 2026 *Climate Informatics*
Lausanne, Switzerland
Oral presentation
- 2025 *Royal Swedish Academy Of Sciences Symposium on AI for Science*
Stockholm, Sweden
Oral presentation
- 2025 *Workshop on Machine Learning for Earth System Modelling*
Bonn, Germany
Oral presentation
- 2025 *Learning on Graphs and Geometry Meetup*
Uppsala, Sweden
Oral presentation
- 2024 *Conference on Neural Information Processing Systems (NeurIPS)*
Vancouver, Canada
Poster presentation
- 2024 *ELLIIT Focus Period Symposium: Machine Learning for Climate Science*
Linköping, Sweden
Poster presentation
- 2024 *Large-Scale Deep Learning for the Earth System Workshop*
Bonn, Germany
Oral presentation

- 2024 *International Conference on Machine Learning (ICML)*
Machine Learning for Earth System Modeling Workshop at ICML 2024
Vienna, Austria
Workshop poster presentation
- 2024 *ESA-ECMWF workshop on Machine Learning for Earth System Observation and Prediction*
Frascati, Italy
Oral presentation + poster presentation
- 2024 *ELLIIT Annual Workshop*
Lund, Sweden
Poster presentation
- 2024 *WASP Winter Conference*
Norrköping, Sweden
Poster presentation
- 2023 *Conference on Neural Information Processing Systems (NeurIPS)*
Tackling Climate Change with Machine Learning Workshop at NeurIPS 2023
Online attendance
Workshop poster presentation
- 2023 *Large-Scale Deep Learning for the Earth System Workshop*
Bonn, Germany
Oral presentation
- 2023 *Nordic Conference in Mathematical Statistics (NORDSTAT)*
Gothenburg, Sweden
Oral presentation
- 2023 *International Conference on Artificial Intelligence and Statistics (AISTATS)*
Valencia, Spain
Poster presentation
- 2023 *Swedish Symposium on Image Analysis and Deep Learning*
Norrköping, Sweden
Poster presentation
- 2023 *WASP Winter Conference*
Norrköping, Sweden
Poster presentation
- 2022 *AI Day Finland*
Helsinki, Finland
- 2022 *Learning on Graphs Conference (LoG)*
Online attendance

- 2022 *International Conference on Machine Learning (ICML)*
Continuous Time Methods for Machine Learning Workshop at ICML 2022
 Baltimore, U.S.
 Poster presentation + Workshop poster presentation (*Cancelled due to illness*)
- 2022 *Nordic Probabilistic AI Summer School*
 Helsinki, Finland
 Poster presentation

Grants

Co-applicant

- 2026 ICAIN-IGAIP project (320,000 CHF, 4/40 applications funded)
 Project *AI-Powered Early Warning and Profiling for Displaced Populations*, headed by Christina Humer (PI, ETHZ) and in collaboration with the International Organization for Migration.

Compute grants

- 2026 Co-applicant for Swiss-AI Large compute grant (754,000 total GPUh)
 Head of work package *Efficient and Distributionally Accurate Generative Ensemble Models* (60,000 GPUh)

Career development grants

- 2023 Research Visit Scholarship ($\approx 60,000$ SEK)
 Wallenberg AI, Autonomous Systems and Software Program (WASP)

Other Academic Activities

- 2023– Creator and maintainer of the *Neural-LAM* open source python library for machine learning weather forecasting models.
- Mentor for Google Summer of Code project 2026.
- 2023–2025 Co-organizer of monthly online meetups for researchers working on machine learning limited area weather forecasting models.
- 2022–2025 Organizer of the *STIMA Machine Learning Reading Group* at Linköping University.

Reviewing

- 2024,2026 Conference on Neural Information Processing Systems (NeurIPS)
- 2025,2026 International Conference on Learning Representations (ICLR)

2023,2024,2026	International Conference on Artificial Intelligence and Statistics (AISTATS)
2026	Geoscientific Model Development (GMD)
2026	Quarterly Journal of the Royal Meteorological Society (QJRMS)
2026	Climate Informatics conference
2026	Geomatics, Natural Hazards and Risk
2025	Geophysical Research Letters (GRL)
2024,2025	Tackling Climate Change with Machine Learning Workshop
2025	Scientific Online Letters on the Atmosphere (SOLA)

Media Coverage of Research

- 2024 *De vill göra väderprognoser mer pålitliga – med hjälp av AI*
News coverage, SVT (Swedish Public Service Television)
- 2023 *Förbättrade väderprognoser med AI*
News posting, Linköping University

Scientific Outreach and Popular Science

- 2026 *Towards Regional High-Resolution Weather Forecasting with ML*
Contributed to panel discussion as part of the Destination Earth course *Machine Learning for Earth Systems Modelling*.
- 2025 *AI för prognosmeteorologer*
Lecture for professional forecast meteorologists in Sweden, about general AI technology and AI models for weather forecasting.
- 2025 *Forskningsframsteg inom Maskininlärning för Väderprognoser*
Popular science article about machine learning weather forecasting published in Polarfront, the journal of the Swedish meteorological society.
- 2025 *Doing a PhD in Machine Learning and AI within WASP*
Talk for undergraduate students about machine learning research and doing a PhD within the AI area.

Specific Skills and Knowledge

- Extensive knowledge of modern **machine learning** methods. Specific expertise in:
 - Probabilistic deep learning

- Spatio-temporal models of physical systems
- Bayesian models and inference methods
- Graph neural networks
- Sound knowledge of good **software engineering** practices, acquired from my undergraduate studies and research experience.
- Programming languages and frameworks:
Python, PyTorch, SciPy, NumPy, PyTorch Lightning, Xarray, PyTorch Geometric, scikit-learn, Bash, R, C++, JavaScript
- Highly accustomed to **Linux** environments.
- Used to working with **high-performance computing** systems.
- Languages:
 - Swedish: Native
 - English: Fluent
 - German: Basic skills
